

Drawing amendment

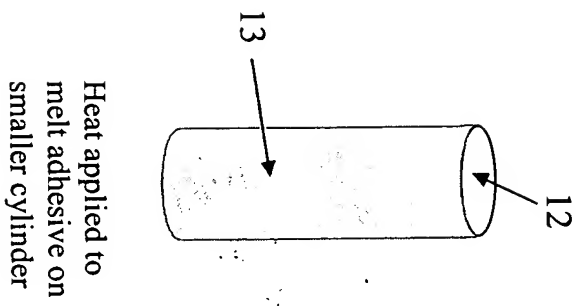

The drawings are objected to under 37 CFR 1.83(a) because they fail to show the two cylinders adhered using the claimed adhesive, referred to in the Specification on Page 4, lines 8-9; page 8, line 16; page 9, line 15; and page 12, lines 6-19. The subject matter of this application is considered by the Office to admit of illustration by a drawing to facilitate understanding. Applicant is required to furnish a drawing under 37 CFR 1.81 illustrating the subject matter previously referenced.

A figure, FIG. 4, is enclosed which shows two cylinders adhered using the claimed adhesive according to the references in the Specification as noted above. FIG. 4 does not introduce new matter as all of the elements in FIG. 4 are described in the Specification, particularly on page 8, lines 17-22. FIG. 4 was referenced in the Specification but was unintentionally omitted in the submitted Application. The previously submitted figure designated as FIG. 4 has been re-labeled as FIG. 5 (also enclosed), making the figure consistent with the description in the Specification (see page 4, lines 8-9).
